SUMMARY

Aspiring Full Stack Developer skilled in Java, Python, HTML, CSS, JavaScript, and MySQL. Experienced in building responsive front-end interfaces and scalable back-end systems. Eager to contribute to dynamic SaaS applications using clean code, API integration, and modern development tools..

EDUCATION

Degree	Specialization & Institute	Year	CPI
B.Tech	Computer Science & Engineering, Gudlavalleru Engineering College	2022-2026	8.68

WORK EXPERIENCE

Full Stack(MERN) Developer Intern

April-June 2024

SmartInternz

- Developed a **full-stack MERN (MongoDB, Express.js, React, Node.js) application** for grocery management, **demonstrating proficiency in modern web development frameworks and technologies.**
- Engineered a **complete and functional grocery application, encompassing both backend logic and front-end user interface development using JavaScript.**

Google Cloud Generative AI

January 2026- May 2026

APSCHE

- Developed **Civil Engineering Insight Studio**, an AI-powered platform for analyzing and generating civil engineering insights.
- Utilized **Google Cloud Vertex AI** to integrate Generative AI models for intelligent data processing.
- Designed prompt-based workflows to generate **technical summaries, reports, and recommendations**,Built backend services using APIs to connect user input with AI models.

PROJECTS

Resolve Now : Your Platform for Online Complaints

- Built a secure web platform for lodging, tracking, and resolving complaints online.Integrated role-based access control for users and administrators.
- Enabled real-time complaint tracking with automated email/SMS notifications.Designed an admin dashboard for efficient complaint review and resolution.
- Ensured data security with encrypted storage and secure authentication.Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

Predicting Melanoma Metastasis Using ISIC and TCGA Datasets with Hybrid Deep Learning

- Developed a **hybrid deep learning model** to predict melanoma metastasis by combining medical images and clinical/genomic data.
- Utilized **ISIC dataset** for dermoscopic images and **TCGA dataset** for clinical and genomic features.
- Implemented dual-model architecture using **ResNet and EfficientNet-B0** for advanced feature extraction.
- Integrated **multimodal data (image + metadata)** to improve prediction accuracy.
- Performed **data preprocessing** including image normalization and feature scaling
- Designed and trained the model using deep learning frameworks (TensorFlow / PyTorch), Evaluated model performance using metrics like **accuracy, precision, recall, and F1-score.**

TECHNICAL SKILLS

- Languages:** Java, Python, Familiarity with AI/ML Concepts
- Databases:** MySQL
- Web Technologies:** HTML, CSS, Javascript
- Tools:** Jupyter Notebook, VS Code, GitHub version control systems, Docker
- Frameworks and Libraries:** React.js, Scikit-learn, TensorFlow, PyTorch, Seaborn, MLflow, ZenML

Certifications

- Python - HackerRank
- Programming using Java - Infosys Springboard
- Artificial Intelligence Fundamentals - IBM
